FORESTRY AND NURSERY

PLANTING MATERIAL

THE KELSEY NURSERY SERVICE IS UNIQUE.

Our facilities for furnishing reliable planting stock are those of any responsible, well established Mercantile Company for supplying varieties in quantity and complete assortments—the best the market affords—at lowest prices. Our relations to our growers of Nursery Stock are precisely those of any Merchant concern, such as a Department Store to the various producers and manufacturers furnishing the goods it offers. Our patrons thereby have the benefit of a broader selection than can possibly be offered by any single nursery or combination of nurseries.

We give careful attention to the selecting, grading, packing, forwarding and tracing so that the stock may be received for planting in fresh condition.

In order that our patrons may obtain their requirements also on the most favorable terms, we eliminate all unnecessary overhead charges, supplying the material at low net prices and in this way the bare expense of packing and transportation are at actual cash cost to the purchaser.

Owing to the continuance of United States Quarantine "No. 37" an embargo against the importation of all nursery stock, we recommend placing orders now to avoid scarcity and very likely higher prices later, whether the stock be required this Autumn or next Spring.

It is always agreeable to us to have examinations made either by samples under the usual specifications or of larger stock in nursery if desired.

F. W. KELSEY NURSERY COMPANY

*NOTE:—Special Rates in carload lots, on request.

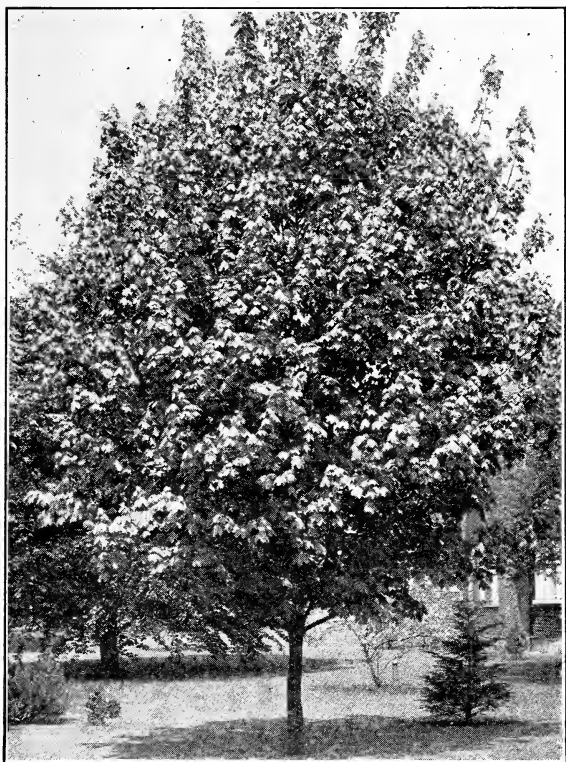

Our **SHADE TREE FAMILY** includes all the others—**ASH, BEECH, BIRCH, CHESNUT, GINKO, LINDEN, MAPLE, OAK, POPLAR**, etc.—in good supply of the more desirable varieties and sizes. Let us know your requirements and we shall be pleased to quote you special or combination rates accordingly.

TREE SURGERY—Our "Tree Doctors" are tree insurance. And this is especially true with the advent of irresponsible or "quack" tree doctors. Our service is dependable, efficient, and satisfactory and our charges are reasonable. We shall be pleased to send an expert to examine your trees and give you an estimate.

"Trees climb slowly to their height, through days and months and years." Plant Kelsey "Quality First" trees to shorten these long years.

A masterpiece without a frame lacks the effectiveness of a finished product—its value is estimated proportionately. Our "Quality First" planting material has for the home-site, country estate or park, all the advantages of the frame for the masterpiece. The many complimentary reports coming in from our shipments, are ample evidence of this. (See Leaflet enclosed.)

Our nearly a half century of experience and observation enable us to assure you satisfaction.

NORWAY MAPLE (ACER PLATANOIDES)

One of the most desirable for street and park planting. (See special offers, opposite page.)

EVERGREENS

AMERICAN ARBOR VITAE (*Thuja Occidentalis*)

KELSEY NURSERY SERVICE

Is being expanded to keep apace the times—affording a service that merits the name.

Consulting with us on your planting problems and the hardy stock required, will pay good dividends in both present and future satisfaction. Being conversant as we are, with the important landscape features here and abroad, we shall be pleased to advise with you on either formal landscape treatment or naturalistic development of Woodlands (see enclosed Leaflet).

We are in position to recommend competent superintendents and head gardeners—our method of securing first hand data assures reliable and efficient men for these positions.

Where planting, construction of roadways, paths, etc., are desired, we shall be pleased to arrange these for you or recommend dependable experts for carrying out your requirements.

Improving Woodlands

The growing interest in the treatment of natural woods and woodlands for country estates and Public Parks, indicates a need for landscape facilities to properly accomplish these improvements.

In many ornamental grounds where attractive lawns, landscape plantings, gardens and flowers, are ideally perfect, it is noticeable that the adjoining woodlands are either neglected or lack the plan and planting treatment which will make them a feature in keeping with the other landscape embellishments.

KELSEY NURSERY SERVICE

has been extended to include this service.

Consulting us regarding this kind of landscape treatment can, with suitable plans and the use of the hardy indigenous native Trees, Evergreens, Shrubs, Vines, Herbaceous Plants, etc., accomplish pleasing woods planting effects. We are well equipped for this service and for furnishing the requisite planting material.

From study and observation of this needed improvement and an acquaintance with the qualified experts for making effective plans, we can offer our present and prospective patrons efficient service in consulting us without obligation on this subject.

PRACTICAL RESULTS

On arrival of a recent shipment of two orders for nearly 15,000 trees sent to the Pacific Coast, we had this report from the President of the Company notwithstanding one car of this stock was unduly delayed almost three weeks en route:—

"Shipment of trees arrived today and we want to say that it is a very fine lot of trees. Our fruit inspector said that he had never seen a nicer lot of trees come into the state of Washington."

And this transaction was followed by an inquiry for "more of these trees."

"We are delighted with the Rhododendrons. They are fine plants and arrived in good order. The same is true of the other stock."

This comes from a shipment of several thousand plants to one of the leading trunk railroads.

"A year ago I bought of you one lot of 1000 Hemlocks. It proved a very good shipment, and I would like to buy some more for this season's planting."

From a large country estate in Massachusetts.

"All items of order received and all very satisfactory plants."

Report from a prominent Landscape Architect whose list we furnished complete—a special feature of the Kelsey Nursery Service

"I am glad to say the (four cars) Rhododendrons arrived in good condition, and we did not have as much trouble in unloading them as I had anticipated"

"Enclosed herewith find check for work done on the trees at my place during the months of October and November. I noticed your men at work and was particularly pleased with their knowledge of the subject and the industry they displayed on the job. Your service appears to be quite satisfactory."

A word regarding our "Tree Doctoring" which resulted in another call from the writer for his new country place the following season.

These are just a few of the scores of similar reports and letters we are continually receiving, unsolicited, indicating the quality of our stock, excellence of our packing and the affect of our facilities for tracing and securing prompt delivery of all shipments—features that have made the Kelsey Nursery Service more and more appreciated and resulting in mutual satisfaction.

"BUDGETIZE" Your planting appropriations.

Good business has decreed the Budget System, a most effective safety valve to insure economic results. What is successful in good business is applicable to planting matters. We are recommending to all our patrons the desirability of putting the planting stock for their grounds on a budget basis, thus giving them a maximum of value for a minimum outlay. Acquaint us with your appropriation and let us make suggestions.

TREE SEEDS:—With the growing interest in Forestry for commercial and experimental purposes, the advantages of reliable high germinating quality, fresh crop, forest tree seeds, is appreciated. For assured satisfaction, this is becoming "headquarters" for standard kinds of forest tree seeds, domestic and imported varieties—we having furnished leading State, Governmental Departments and large private users for many years. Let us know your wants, for quotation.

GARDEN ROSES: Flowering sizes of **EVERBLOOMING, HYBRID PERPETUALS, HYBRID TEAS, CLIMBERS**, etc., in leading selected varieties, in fine assortment and best colors, we can furnish in quantity. We shall be pleased to quote you special rates on your Rose Garden requirements.

HERBACEOUS PERENNIALS: All the popular flowering varieties, in good strong plants or clumps can be furnished at attractive prices. Proper selection for early flowering and continuous bloom is a service we take pleasure in extending you.

FRUITS and NUTS: With the increasing demand for our true-to name, dependable fruits, insuring best final results, we are equipped to furnish these in select orchard and commercial varieties—all grades including "extra size" bearing age. We shall be pleased to extend you the benefit of our many years of experience in handling this stock for consultation and suggestion without obligation. Our "Quality First" trees give best final results at minimum cost and risk.

ONLY A FEW SPECIAL OFFERS, special as to varieties, quality and prices, are shown herein. Our available supply of the other more desirable varieties is ample; and we recommend you to take up with us for special quotation such items as you may be interested in or require. These prices contemplate furnishing 250 or more at the 1000 rates—50 or more at the 100 rates.
